Safe Project File Cleanup & Repository Health Audit

Status: Non-Destructive Analysis (0 Files Modified)
Date: August 29, 2026 | **Scope:** Full Repository Inventory & Health Review

1. Executive Summary

This audit inspects the entire KnowledgePaat repository. All 64 frontend routes, 15 API Route Handlers, components, SWR query cache, rate limiter, and SQL migrations are verified active. 132.8 MB of local load-test binaries (k6.exe) and identical duplicate .doc reports were identified for local exclusion via .gitignore upon user approval.

2. Total Project File Overview Table

Directory / Module	Count / Size	Classification	Purpose & Verified Role
frontend/app/ (64 Routes)	64 Page/Layouts	■ REQUIRED	Next.js 16.3 App Router Pages & Layouts
frontend/app/api/ (15 APIs)	15 Handlers	■ REQUIRED	Active Server Route Handlers (100% Production Backend)
frontend/components/	10 Components	■ REQUIRED	Reusable UI Component Library
frontend/lib/	16 Utilities	■ REQUIRED	Core Modules: SWR Cache, Rate Limiter, Logger, AI
frontend/hooks/ & context/	6 Modules	■ REQUIRED	useClientQuery, FeatureFlags, ThemeContext
frontend/scripts/	23 Test Scripts	■ LOCAL DEV	Development verification & seed scripts
load-tests/scenarios/ & config/	5 Scripts	■ REQUIRED	k6 Load Testing Scenario Suite
load-tests/bin/	132.8 MB (Binaries)	■ LOCAL ONLY	k6 Windows Executable Binaries
scripts/	2 Generator Scripts	■ LOCAL ONLY	Docx and PDF Document Generator Utilities
backend/ (FastAPI Prototype)	1 Service	■ LEGACY	Inactive prototype (0 production traffic)
Root SQL Migrations	33 SQL Files	■ MASTER / ■ STEPS	Master Schema & Step Setup Scripts
Root Audit Reports & Docs	12 Documents	■ LOCAL ONLY	Word, PDF & Markdown Architecture Reports

3. Duplicate Files Analysis

Original File	Duplicate File	Similarity	Action Recommendation
KNOWLEDGEPAAT_ARCHITECTURE_REVIEW_REPORT.docx	KNOWLEDGEPAAT_ARCHITECTURE_REVIEW_REPORT.doc	100% Byte-for-Byte	Delete .doc duplicate upon approval
KNOWLEDGEPAAT_CAPACITY_AND_PERFORMANCE_REPORT.docx	KNOWLEDGEPAAT_CAPACITY_AND_PERFORMANCE_REPORT.doc	100% Byte-for-Byte	Delete .doc duplicate upon approval
load-tests/bin/k6.exe (66.4 MB)	load-tests/bin/k6-v0.56.0-windows-amd64/k6.exe	100% Byte-for-Byte	Delete extracted subfolder upon approval

4. Recommended Actions & Approval Gate

- **Safe Deletions:** Delete exact duplicates (.doc reports and redundant extracted k6 archive folder).
- **.gitignore:** Add proposed root rules to exclude local binaries (k6.exe) and local reports from Git.
- **Keep Untouched:** All application source code, 64 pages, 15 APIs, hooks, components, and SQL migrations remain intact.
